

# Your quest for 'the best' is our Guarantee

## Our pledge to you:

**Q**uality inspections and constant supervision at every stage of construction to ensure a superior finish every time. An independent building inspection is provided on completion of each new home. We'll ensure your home meets our strict quality guidelines and exacting standards, giving you peace of mind and the assurance of a job well done.

**U**nparalleled inclusions and attention to detail at every level. We pride ourselves on the standard others call 'extras'. With premium inclusions, outstanding design features and all inclusive 'set price' building contract, the only extras you pay are the extras you want.

**E**nvironmentally responsible building practices are another measure of our commitment to quality. Unique building products from sustainable sources set a new mark of product excellence and point of difference. We ensure the timbers used in our homes come from both renewable plantations and native forests that meet high standards of environmental, social and economic sustainability. Many of these forestry practices are overseen by Green Peace.

**S**ustainable design and superior quality, our quality made products will add lasting value to your home. With many of our suppliers offering between five and fifty year guarantees on their products, you can be rest assured that you'll have the very best the industry has to offer. These products not only offer long term resilience to our harsh climate and daily wear n' tear, but add beauty and functionality as well.

**T**True value, time tested appeal and service second to none. Our committed staff and trade contractors are ready to assist you when you are ready to build. Fantastic service is our promise to you, so call us today.

**Office and Showroom Open  
Unit 5, 1 Samantha Place, Smeaton Grange**
